

May 6, 2015

Dear Customer,

As part of our ongoing product lifecycle management, Astronics 3151/3151A and 3152/3152A, arbitrary waveform generators have transitioned to an “obsolete/unsupported” status. The increasing shortage of replacement components has made it difficult to continue supporting this line. The status change applies to part numbers below and is effective immediately.

Model	P/N Series
3151 (all models)	407382-xxx
3151A/A+ (all models)	407824-xxx
3152 (all models)	407510-xxx
3152A (all models)	407808-xxx

The 3151/3151A and 3152/3152A are now replaced by the new 3151B/3152B family of VXI arbitrary waveform generators. This family includes:

Model	Description
3100M-W1	Single channel 250MS/s AWG (new applications)
3100M-W1W1	Dual channel 250MS/s AWG (new applications)
3151B	Single channel 250MS/s AWG with 3151/3151A+ emulation
3152B	Single channel 250MS/s AWG with 3152/3152A emulation

A list of emulation compatibility details for 3151/3151A to 3151B migration and 3152/3152A to 3152B migration are available upon request.

We want to thank you for your business and are committed to providing you with the highest quality products and services. If you have any questions, please contact us.

Sincerely
