

October 1, 2014

Dear Valued Customer,

Our records indicate that your company has purchased a Racal Instruments™ 7066 RF Prototyping Module and/or their enclosures, during the last 10 years. The item you purchased may have been branded as Racal Instruments™, EADS North America Test and Services or Astronics Test Systems.

The Racal Instruments™ 7066 RF prototype module was introduced in 1997, was removed from our price list some time ago, and is now formally transitioning to obsolete status. We have been unable to identify a source for obsolete components; therefore, the below listed 7066 products are obsolete with no last time buy program.

7066 Obsolete Status with No Last-Time-Buy Program:

<u>Part Number</u>	<u>Model Number</u>	<u>Description</u>
R-7066	7066	Single-Slot RF Prototype Module, No Interface
R-7066/01	7066/01	Double-Slot RF Prototype Module, No Interface
R-7066/02	7066/02	Triple-Slot RF Prototype Module, No Interface

We regret that we are unable to accept production orders for any of the above-listed items.

Available Service, Calibration, Repair and Support for 7066:

Full service, calibration, repair, and customer support will remain available for the 7066 product(s) for a target of 5 years from the date of obsolescence, provided that the components required for the repair remain available. Once components required for repairs are no longer available, service is provided on a best effort basis. For questions regarding Customer Support, please email atshelpdesk@astronics.com or call 1-(800) 722-2528.

There are no drop-in replacements for the 7066 products; however, customers are encouraged to discuss current prototyping module requirements with an Astronics Sales Representative.

We regret any inconvenience this may cause. We have a team of instrumentation application engineers, and ATE integration specialists available to assist in providing state-of-the-art instrumentation solutions to meet your test needs.
