

**Release Notes
ATLAS Compiler
Version 3.23.18 (20060302)
02 March 2006**

1 Overview

The following describes an overview of changes included within version 20060223 (3.23.18) of the following ATLAS compiler(s)

ESTS / PAWS
IFTE / PAWS

1.1 Enhancements

1.2 Problem Reports

06-999

2.0 Detailed Description

2.1 Enhancements

None

2.2 Problem Reports

2.2.1 06-999 - Allocator "No UUTPin ### (FATAL)"

ESTS / IFTE Compiler version 20060223 (3.23.26) included a correction for PR06-011. That PR required that at least one blank character terminated a CNX <Port>. That change was incomplete and caused <Ports> to be incorrectly recognized as a <UUTPin> if the <Port> was terminated by a NEWLINE character, i.e. was at the end of a line.

Example

```
CNX HI P05 LO P06 SENSE-HI
      P07 SENSE-LO P08      $
```

This release of the ESTS / IFTE compilers requires that a <Port> be terminated by any *whitespace* character, i.e. BLANK, TAB or NEWLINE.
